Must be run on an IOS Simulator

How to run on MacOS:

Have the following installed:
> XCode
>Homebrew
>Use Homebrew to install Yarn (run 'brew install yarn' in terminal)
After installing necessary dependencies,
1. Move the ForgetMeNot Folder to your users folder

In Terminal:

1. Run cd ForgetMeNot to be in the folder
2. Run 'yarn install' inside the ForgetMeNot folder
3. Then run 'react-native run-ios'

This should open up the simulator and the app should open up automatically.

https://facebook.github.io/react-native/ (The react native tutorial if there was anything unclear in the instructions or if it didn't work)
